

MONEY ON LOAN at 23 per Cent. per
ANNUAL—ARNEWAY'S CHARITY.—NOTICE IS
HEREBY GIVEN that the Trustees of the City of New York
 to lend such sums of money to poor mechanics or laborers residing
 in the City and Liberty of Westminster, that is to say
 within the parishes of St. Margaret and St. John the Evangelist,
 St. Anne, St. Nicholas, St. Clement, St. Dunstons, St. George, Hanover-square,
 St. James, St. Martin, St. Michael, St. Paul, St. Peter, and St.
 Paul, Covent Garden. The amount of each loan is not to exceed
 £10, to be repaid with interest at the rate of 23 per cent. per annum,
 and to be secured by the bond of the borrower, with two sureties.
 Printed Pursuant to an Act of Parliament, bearing date the 10th of
 August 1834, by signing personally, between the hours of Ten and
 three o'clock in the day, at the office of the Clerk and Solicitor to
 the Trustees, No. 14, Great Queen-street, St. James's Park.
EDWARD A. STEPHENSON,
 By order.

DAMP and GASEOUS EXHALATIONS

SANITARY MEASURES.
MEMBERS OF THE BOARD OF HEALTH are especially DIRECTED
to the following EFFECTIVE MEASURES TO BE ADOPTED TO
PREVENT THE INJURIES AND OFTEN FATAL EFFECTS upon the
HEALTH OF THE COMMUNITY, arising from—
1. The presence of manure, decayed animal matter, or in grave
yards, stagnant water, or other sources of miasmatic emanations,
which produce a miasmatic miasm of atmosphere, in situations so affec-
tious as to impair the salubrious quality of the AIR.
2. The impure quality of the ASPHALTE of REBELS resulting
from the use of portion PAYMENT or COVERING that can be relied
upon for the purpose of covering the surface of the streets,
and the escape of noxious vapours. The present effective
application of this material for covering the streets, and
for preventing the permeation of wet, and noxious effluvia
of the atmosphere for the above purposes.

J. FARRELL, Secretary.

KEYSSEL ASPHALTE COMPANY,
Stangate, near Westminster-bridge, London.

* * The exclusive supply of ASPHALTE from the MINES of
PYRMONT KEYSSEL is conceded to this COMPANY.

G. BELL and CO., Station Mills, 2, Wellington-street,
Glasgow-street.

HUBBUCK'S PATENT WHITE ZINC PAINT—The PERMANENT WHITE of the chemists, and by its constant use has been found to be the one of the artist, is now adopted by the most celebrated painters of the world.

For four years ago the proprietors of this famous paint, in consequence of a large sale, and put this elegant Paint in competition with White Lead.

It has obtained superiority over every other paint hitherto known, and has brought forward no rivals.

These inferior productions, especially made from the same compounds, are not only inferior in color, but they are also very injurious to health, deficient in body, and refuse to dry.

It is for which the original patent should be preserved.

In justice to the proprietors it should not be recommended with the original, even though sold under the pretense, that it is all the same.

Hubbuck's Paint is entirely free from any injurious properties, however, it is valuable in the same coloring, besides its color and brilliancy, is superior to those newly painted with it.

As a guarantee to the painter against the substitution of the inferior

"HUBBUCK, LONDON, PATENT;"
and if the mark has not been so marked, the reason is obvious.
A Circular with full particulars may be had of **THOMAS**
HUBBUCK and SON, Colour Manufacturers, opposite the London
Docks.

THE TWO GREATEST IMPROVEMENTS IN BUILDING
THE SHEET ZINC from the VIEILLE
MONTAGNE COMPANY is already so well appreciated in Great Britain for its superior quality, toughness, and great durability for roofing purposes, &c. that we need only mention that during last year alone several thousand tons of zinc have been used for **COVERING BUILDINGS, SHEATHING SHIPS,** and other manufacturing purposes.

THE PATENT WHITE ZINC PAINT

It was first brought under public notice in England a few years ago by the "Victorian" White Zinc Paint Company. The superiority of this paint over white lead is now well established, and it will suffice to state that the Admiralty and the most eminent professional men have adopted it over others in its class. When used as an anti-rust primer it has the chief advantages of other primers, and is also a most durable, unimpaired by heat or cold, and not injurious to health. For further particulars apply to Mr. H. F. SCHMOLL, General Agent to the "Victorian" Paint Company, 15, Manchester

EVANS'S MINERAL OXIDE PAINTS
Office, 8, Pall Mall East, London.

Green	lbs. per Cwt.
Lead Colored	lbs. "
Shore or Dred	lbs. "
Black	lbs. "
Dark Brown	lbs. "
Yellow (not Turf-colored)	lbs. "

Paintings of I.C. and up wards are not charged.

These preparations of the Mineral Oxide Paints will be found more durable, and at the same time more economical than any other paint.

They are proof against atmospheric action, rain, and salt water, of which the following testimonials are sufficient evidence:

"S. Hilder, agent,
14, April, 1911.

• GENTLEMEN,

"The result of the trial of your Mineral Oxide Paints on the Buirs manufactured by us for the service of the Honorable Commission of the Trinity House, has been very satisfactory, both as regards the quality and the durability of the Paints, and the economy of cost.

"You are at liberty to make use of this testimonial in their favor. We are, Gentlemen, yours obedient servants.

(Signed) "BENJAMIN LEE'S FOX, and CO."

"We have used your paint on the various gas works which we have constructed during the last seven years, and have no hesitation in stating it to be the best and most durable covering for iron."
"We shall continue to use and recommend it as heretofore."
"We are, Sir, yours respectfully,
(Signed) W. WRIGHT and WRIGHTS.
Other testimonials can be had on application.

THE WASHINGTON CHEMICAL COMPANY,
NEWCASTLE-ON-TYNE.

PATTINSON'S OXICHLORIDE of Lead
The Washington Chemical Company having, during the last

year established a Manufactory of Potash in Oriskany, and
Lead on a large scale, and better able to supply it with regularity
than the English, and to prevent the waste of this valuable
and valuable preservation of Lead better their Bricks and the
public, care that it will not, in the present age, be considered
it is now, and that it judged by its merits, it is not made in
any, and finally take its place as one of the important means for the
of the country.

Potash in Oriskany of Lead is a chemical combination of
one equivalent of Chloride of Lead, and one equivalent of Oxide
of Lead, it being well known that the Oxide of Lead is a compound
of Lead and Oxygen, and the Oxide of Lead is a compound
for themselves of Carbonic Acid, constituting what is called
chemical language, Carbonate of Lead. Now there is no reason to
conclude that Carbonate of Lead is the only compound of Lead
known, and it is not likely that it is the last, but the best
pound of Lead that has passed. In point of fact it is not so, as
the newly-discovered Oximuriate of Lead, if not in all respects
far superior the colour is brilliantly white, and in a number of
other respects, and it is not likely that it is the last, but the best
compound, and after a period of upwards of two years it has been
found to retain its white colour, considerably better than the lead
which it was tried.

[illegible]

IN using the Emulsion, no difference in the material was which it is mixed is required. Oil and Turpentine being equally as usual both for work technically. As the Emulsion is made up of Paper Hangers and London Dressed, the Emulsion is found to be perfectly suitable. The Washington Chemical Company strongly recommends this novel discovery as suitable to the notice of chemists, both on account of its economy, and its intrinsic good qualities as a paint.

OFFICE IN LONDON. - Mr. R. CHOKER, No. 7, St. Dunstons.
Office of the Washington Chemical Company,
78, Gray-street, Newcastle-on-Tyne, January 1, 1892.
